Title: SAFE RUSH: A CROSS-PLATFORM MOBILE GAME FOR DISASTER AWARENESS USING UNITY GAME ENGINE

Authors: Jowellen P. Vidor, Mark Anthony S. Basilio, Mystery John A. Piscol

EXECUTIVE SUMMARY

Disaster is the most common Philippines' problem not just in the Philippines but also in the whole world. Disaster may occur in the most unexpected way and time.

Every year Philippine experience horrible disasters that take a lot of lives especially in Visayas area. That is why most of the residence nor Filipinos are now securing emergency kit incase disaster occur.

For the last 5 years herein are the list of disaster fall in the Philippines commonly are the Flood, Earthquake, Fires etc.

Because of these problems, the researchers developed a mobile game application about disaster awareness that would help the people to educate their children on what they are going to do incase disaster will come. The game will not only educate the children but it also give them entertainment and also foresee what are the possible things will happen and how they going to survive.
